**Subject:** Flood Watch for The Moon River - Issued Nov 14, 2013  
**Attachments:** Flood Watch - November 14, 2013.pdf; Flood Outlook - November 14, 2013.pdf

9:45pm, Thursday, November 14, 2013

Dear Members

The attached documents have just been received from sources at the Township of Muskoka Lakes.

Please pay particular attention to the Flood Watch document as it is directly related to the Moon River and, in particular, The Moon Reach.

Members are cautioned that the waters remain high in the Moon River and it is believed that the MNR removed additional logs from the North Bala Falls dam earlier today.

Please take whatever steps are necessary to protect your personal property as much as possible.

I will continue to monitor the situation and will advise if any updates to these notices are received.

**Please Note:** The MNR does not communicate with any ratepayer groups when issuing these warnings and watches. It would seem that this is standard government policy. They rely on the media, local governments and "undefined partners" to disseminate their messaging.

Regards,

Sandy Currie  
President
